Kolhapur, Maharashtra

PROFILE

Senior Full Stack Developer with expertise in architecting and delivering high-performance SaaS web applications. Proven experience in building scalable React.js PWAs, engineering robust Node.js/Express backend systems, and integrating complex third-party APIs (Auth0, Stripe, OpenAI, Gemini). Passionate about mentoring teams, optimizing developer workflows, and driving product innovation from concept to production.

EXPERIENCE

Sr. Software Developer — Full Stack

April 2024 – Present

Walstar Technologies

Kolhapur, MH

- Lead full-stack web application development across complex SaaS platforms, architecting scalable PWAs using React.js, TypeScript, TanStack Query, and MUI X, supporting 500+ active users.
- Consumed Python FastAPI microservice endpoints from Node.js to enable AI-powered document processing and data extraction via Google Gemini.
- Built cron-based automated reporting pipelines using `node-cron` to generate and deliver daily workforce attendance summaries via email to project stakeholders.
- Mentored junior developers, led code reviews, and enforced Git branching workflows, improving delivery timelines by 15%.

Software Developer Trainee — React.js

March 2023 – Oct 2023

Mobilotte Technologies

Pune, MH

- Built and maintained responsive React.js interfaces using modern JavaScript, HTML5, and CSS3, delivering user-facing features across multiple client projects.
- Implemented RESTful API integrations and collaborated within agile cross-functional teams to resolve bugs and ensure seamless frontend-backend integration.
- Contributed to sprint planning and code reviews; improved component reusability by introducing shared UI component libraries.

KEY PROJECTS

Bynaus — Intelligent Construction Operations Platform | React, TypeScript, Node.js, AWS, OpenAI, Gemini

- **Live at:** [app.bynaus.ai](#)
- Architected a multi-tenant SaaS web application for full-lifecycle construction management — covering project setup, cost codes, daily reporting, drawings, submittals, RFIs, and document transmittals — for 500+ active users across a React PWA and Node.js/Express REST API.
- Built a complete workforce and time management suite on the web app with GPS-based clock-in/out, geofence enforcement, timecard management, shift scheduling, and kiosk mode for field sites.
- Built attendance report listing views using MUI X Data Grid Pro, enabling efficient data display, filtering, and export of workforce timecard records.
- Engineered the **Bynaus AI Companion** integrating OpenAI, Google Gemini, LiteLLM, and Ragie to deliver multi-agent chat, AI-assisted contract reviews, playbook automation, daily briefs, and workflow DAGs — reducing manual data processing time by 45%.
- Consumed FastAPI microservice endpoints from Node.js to trigger LLM-based (Google Gemini) extraction pipelines on architectural drawings and sheets uploaded to AWS S3.
- Implemented a PDF vector engine (ASPRYE) with Apryse WebViewer for architectural drawing processing, takeoff calibration, and submittal/RFI document workflows.
- Integrated Sentry for error monitoring across the PWA and API; connected Auth0 SSO, Stripe billing, AWS S3/SQS, Redis, and Google Maps into the platform.

YAU TeamUp (Youth Athletic Union) — Multi-portal Sports Management Platform | React, Tailwind CSS, Firebase

- **Portals:** [Admin](#) | [Coach](#) | [Member](#)
- Developed a scalable multi-portal web ecosystem for admins, coaches, and members, handling complex roster scheduling, team communications, and role-based access control.
- Engineered backend logic via Firebase Cloud Functions and Firestore to securely process 1,000+ weekly data syncs with 99.9% uptime.

Jeff Music Therapy Admin Panel — Music Therapy Dashboard | React.js, Node.js, Express.js, MongoDB

- Designed and built a full-stack administrative dashboard managing a library of 5,000+ media assets with secure role-based access for facility users.
- Engineered RESTful APIs with Node.js and Express, optimizing data retrieval pipelines and reducing backend latency by 15%.

PROGRAMMING SKILLS

Frontend: React.js (Vite), TypeScript, Redux, TanStack Query, Tailwind CSS, MUI X Data Grid Pro, Framer Motion, React Router v7, Formik, Recharts, D3, Apyse WebViewer, dnd-kit, i18next, ExcelJS

Backend & APIs: Node.js, Express.js, RESTful APIs, WebSocket, SSE, node-cron, bcrypt, JWT

AI & Integrations: OpenAI, Google Gemini, LiteLLM, Ragie, Stripe, Auth0, Mailgun, Firebase Admin

Databases & Cloud: MongoDB, Mongoose, Redis, Firebase Firestore, AWS S3, AWS SQS

Tools: Git, GitHub, Bitbucket, Sentry, Postman, Jira

EDUCATION

Dr D Y Patil College of Engineering and Innovation

Bachelor of Engineering in Computer Engineering — 78.44%

Pune, MH

2020 – 2023

Sharad Institute of Technology and Polytechnic

Diploma in Computer Engineering — 85.94%

Ichalkaranji, MH

2017 – 2020
